Prevent Heat Illness at Work

Ease into Work. Nearly 3 out of 4 fatalities from heat illness happen during the first week of work.

Build a tolerance to heat by increasing intensity by 20% each day.

Drink cool water even if you are not thirsty	Rest for long enough to recover from the heat	Take breaks in a shady or cool area	Wear a hat and dress for the heat	Watch out for each other	Verbally check on workers wearing face coverings

News from Human Resources

-Security Health Plan Members – just a reminder to order your quarterly \$30.00 of free over-the-counter drugs. 3rd quarter runs from June 15 to Aug 31. If you have any questions on how to order your free supplies, please give me a call, or email me your questions.

Grilling Safety Tips For Your Summer Barbecue

Although grilling is a popular way to prepare food in the summer, it can also be dangerous. The National Fire Protection Association reports that May, June, July and August are the most active months for grill fires—with July taking the top spot. Additionally, an average of 8,900 home fires are caused by grilling each year.

Keep the following safety suggestions in mind when grilling:

- Check the gas tank hose before using it for the first time each year.
- Keep your grill at least 10 feet away from other objects, including your house, trees and outdoor seating.
- Grill outside only on a flat surface, and don't bring the grill into an unventilated or enclosed space, such as the garage, carport or porch.
- Only use starter fluid with charcoal grills—never with gas grills.
- Keep children and pets at least 3 feet away from the grilling area.
- Don't leave your grill unattended, as fires can double in size every minute.
- Clean the grill regularly to remove grease and fat buildup.

Overall, practicing vigilance and taking proper precautions can help reduce fires and associated burn injuries caused by grills.

Safe Food Temperatures

Prevent foodborne illnesses by grilling meat to the USDA's proper internal temperatures.

A Daily Dose of Coffee Could Benefit Your Heart

According to the American College of Cardiology, drinking two or three cups of coffee every day may benefit your heart. Researchers found that the consumption of caffeinated beverages is associated with a 10% to 15% lower risk of coronary heart disease, heart failure and dangerous heart rhythms—as well as a longer lifespan.

Some people may worry that drinking coffee could trigger or worsen certain heart issues; however, recent studies suggest that daily coffee intake may be included as part of a healthy diet for people with and without heart disease. Furthermore, coffee consumption has not been linked to new or worsening cardiovascular disease. Studies found that drinking coffee either had a neutral effect—thus causing no harm—or was associated with heart health benefits. Cheers to that!

Turkey Burgers

Makes: 4 servings

Ingredients

- 1 pound ground 85% lean turkey
- 2 medium onions (chopped)
- 3 Tbsp. lemon juice
- ¼ tsp. Worcestershire sauce
- ¼ tsp. dried or fresh parsley

Preparations

- 1) Combine the onions, turkey, lemon juice, Worcestershire sauce and parsley. Mix these ingredients well.
- 2) Shape the mixture into four patties.
- 3) Fry the patties in a pan on medium heat or grill them until their internal temperature reaches 165 F.
